

The Voice of AI

Automate conversations, capture every call,
and scale customer communication.

www.voicelogica.ai

Businesses are still handling calls manually

Many businesses still rely on manual phone handling, which creates operational challenges:

**High inbound
call volumes**

**Missed calls and
lost leads**

**Long waiting
times**

**High staffing
costs**

Every unanswered call is a
lost opportunity.

AI Is transforming business communication

Many businesses still rely on manual phone handling, which creates operational challenges:

Email → automated

Chat → automated

Support → automated

Voice is the next frontier.

AI voice agents can now handle real customer conversations.

Meet Voice Logica

Voice Logica enables businesses to deploy AI-powered voice agents that can handle phone conversations automatically. Agents can:

Automated Inbound Call Handling

Handle multiple incoming calls simultaneously, provide information and route calls when needed.

Automated Outbound Calls

Make outbound calls for notifications, surveys or marketing campaigns.

Multilingual Support

Serve callers in their native language.

Appointment Scheduling

Book, change or cancel appointments over the phone and sync with your calendar.

CRM logging & workflows

Record conversations, update the CRM and automatically trigger workflows.

Lead Qualification by Phone

Qualify potential customers, update the CRM and perform follow-ups.

Your AI agent works 24/7

Capabilities:

Answers calls instantly

Books appointments

Provides information

Routes calls

Sends confirmations

**Escalates to a human
when needed**

Human-like conversations.
Machine-level scalability.

How Voice Logica works

Customer Call

The customer calls your business anytime. No waiting, no frustration - the experience starts instantly.

AI Voice Agent

The AI agent answers immediately, engages in natural conversation, and understands the customer's needs like a real representative.

Intent Detection

It identifies the purpose of the call (booking, information, support) and accurately understands the request in real time.

Action

- book an appointment
- update CRM
- send SMS
- transfer call

Booking an appointment

Scenario:

A customer calls a clinic.

The AI agent:

1. answers the call instantly
2. asks for the reason of the visit
3. checks available slots
4. books the appointment
5. sends confirmation SMS

Result:

- zero missed calls
- faster booking
- better customer experience

Hello!
I'm the **AI Voice Agent!**

Hello! I would like to book an appointment with a cardiologist.

Of course! Which day and time would work best for you to schedule the appointment?
Would you like a specific cardiologist?

I would like it on the 15th of this month in the afternoon.
I don't have a specific doctor in mind.

Status
Call Status: Answered
End Call Reason: caller_hungup

Webhook Notification
Resend the webhook notification with this call's data to your configured endpoint.

Built on telecom expertise

Voice Logica is built on the telecom infrastructure of Yuboto, a trusted communications provider in Greece.

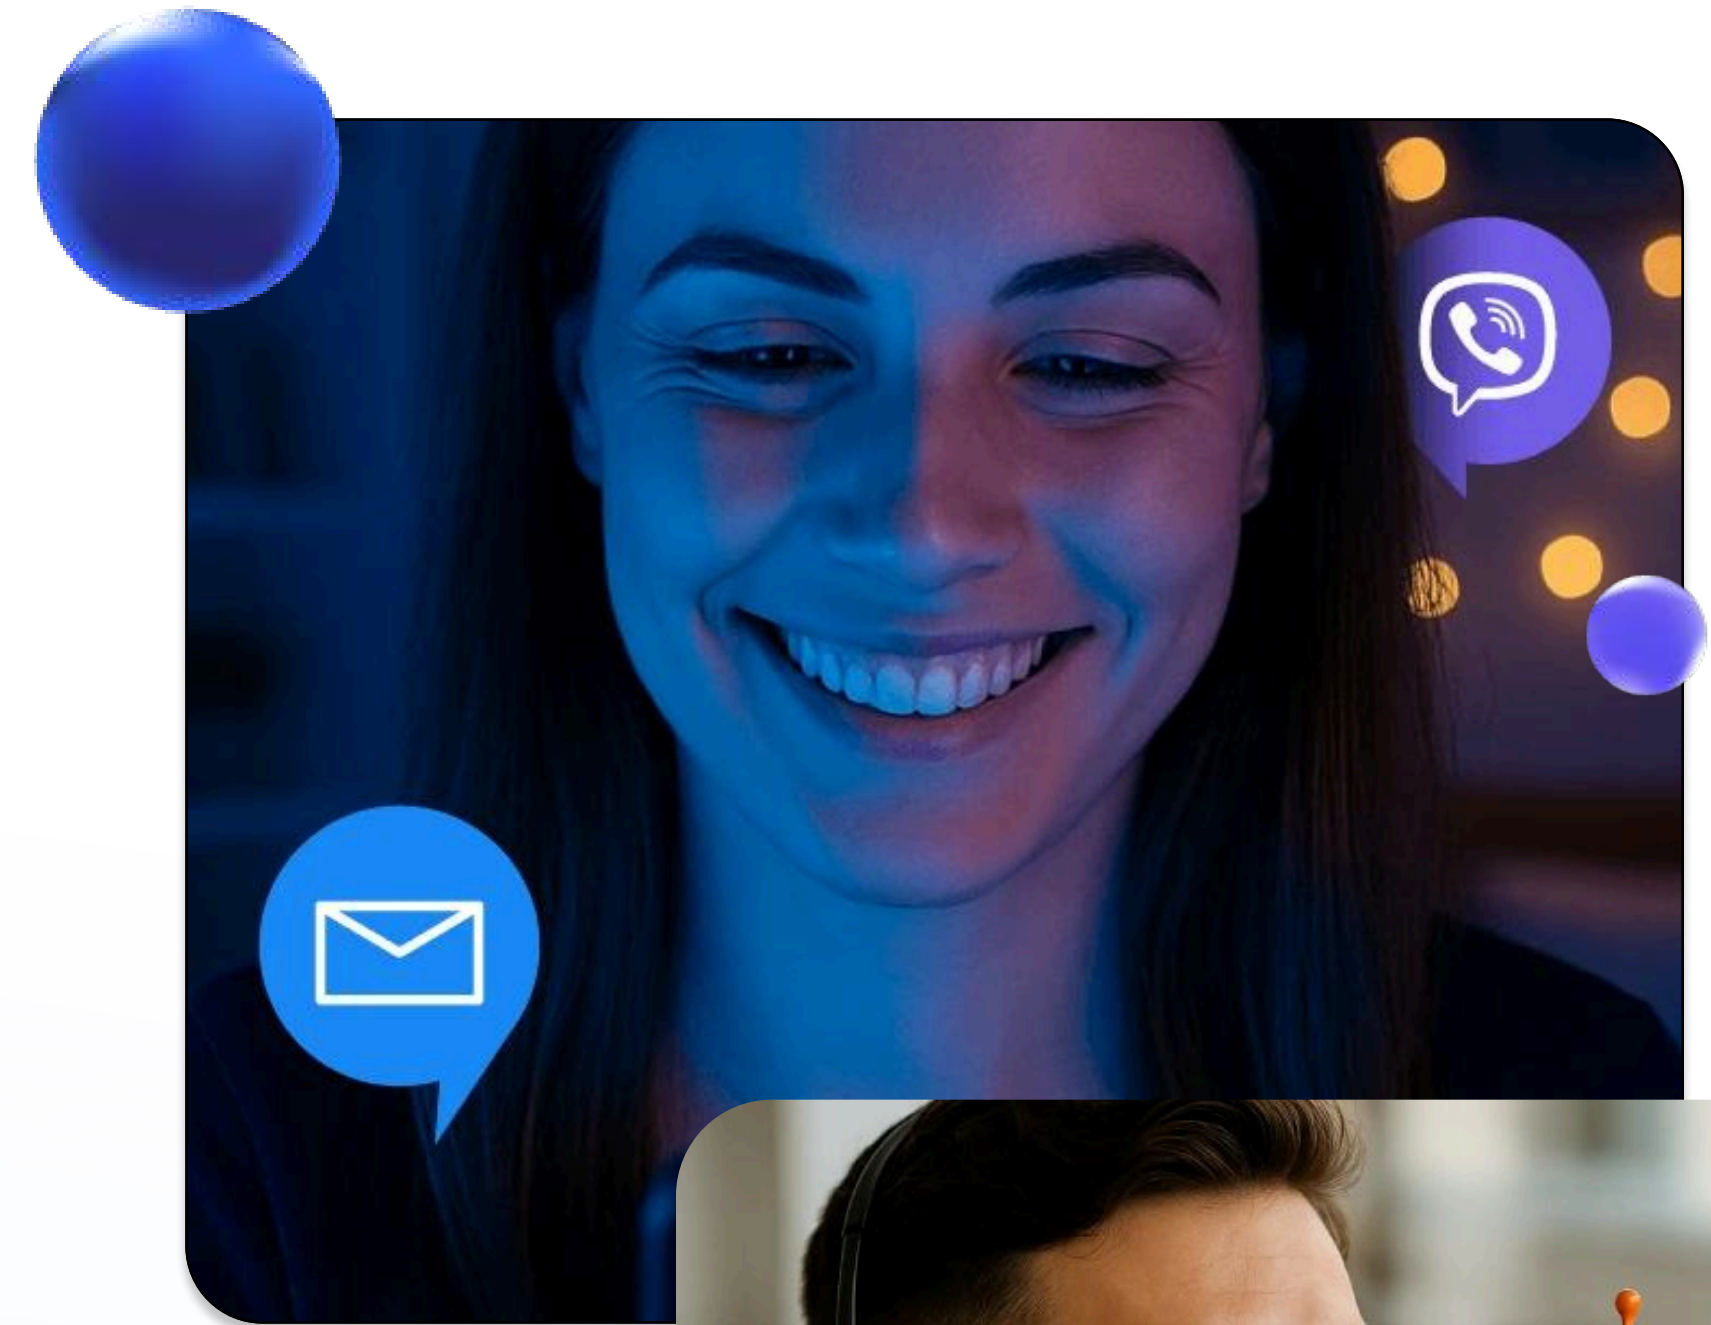

The platform combines:

- advanced AI voice technology,
- telecom-grade voice infrastructure,
- reliable call routing and connectivity, and
- scalable communication services.

Result:

- Stable voice connectivity.
- Enterprise-grade reliability.
- Scalable call handling.
- Trusted Telecom foundation.

This ensures that AI voice agents operate with high reliability and call quality.

Built to work with your systems

Voice Logica integrates with:

- CRM platforms
- Google Calendar
- booking systems
- internal APIs
- messaging services

This allows AI agents to become part of the existing business workflow.
